This was important for me because as Asana became a major part of my workflow, I wanted it to behave like Things, which has been one of my favorite productivity apps for non-work tasks.. It also works great for other web apps, like Google Analytics or Spotify Pro Tip: I like my dock and desktop to look nice, so I changed the icon of the resulting Asana app so that it looks like an Asana icon.. Fluid does the rest to create an app that you can place in your dock for all your productivity pleasure.. The process is simple Download and install Fluid and when it asks for the URL of the web app, just copy and paste the link of your "My Tasks" Asana page.. Download AppSana for Asana with Notifications for macOS 10.10 or later and enjoy it on your Mac.. Fast-moving teams rely on Asana to coordinate and manage the work they do in Microsoft Office. b0d43de27c [dre beats pro serial number location](#)
